EDUCATION

Babcock University <i>B.Sc. Computer Information Systems</i>	Nigeria 2021
--	-----------------

ICT University <i>B.Sc. Software Engineering</i>	Nigeria Expected 2026
--	--------------------------

Aptech Learning Center <i>Advanced Diploma in Software Engineering</i>	Nigeria 2023
--	-----------------

EXPERIENCE

Software Developer (Contract) <i>UNAG Services</i>	Aug 2023 - Dec 2023 Nigeria
--	--------------------------------

- Architected and delivered a full dynamic website from scratch as the sole frontend engineer, completing the project 2 weeks ahead of schedule
- Designed and implemented scalable frontend architecture using React and component-based design patterns, improving long-term maintainability
- Built responsive, cross-browser compatible web pages for Chrome, Firefox, and Safari, reducing reported rendering bugs by ~30%
- Applied responsive design principles (mobile-first) to ensure seamless UX across devices, improving mobile usability scores
- Collaborated with backend team in an Agile workflow to integrate REST APIs and align deliverables with sprint goals

Software Developer	2026
---------------------------	------

Mocktail Canapes | mocktailcanapes.com

- Designed and developed the complete website for Mocktail Canapes, a hospitality brand, from concept to live production
- Built a responsive, mobile-first layout with smooth UX to showcase the brand's menu and services, improving customer engagement
- Implemented performance optimization techniques including lazy loading and asset compression for fast page load speeds
- Delivered the full project independently, managing client communication, timelines, and iterative design feedback

Software Developer	2025
---------------------------	------

Mells Healing | mellshealing.com

- Designed and developed a fully functional appointment booking website for Mells Healing, a massage therapy company, from concept to live production
- Built an intuitive booking flow with real-time availability, service selection, and confirmation notifications
- Implemented a responsive, mobile-first design optimized for ease of use across all devices, increasing mobile booking conversions
- Delivered the full project independently, managing client feedback, iterative design revisions, and production deployment

Frontend Developer	2025
---------------------------	------

Velocityautologic

- Built and delivered the complete frontend for Velocityautologic, a logistics company, from design to production as the sole engineer
- Developed key features including shipment tracking, service request forms, and a dynamic quote calculator
- Implemented a responsive, cross-browser compatible UI using React and Tailwind CSS, ensuring seamless UX across all devices
- Integrated REST APIs for real-time data display and optimized performance with lazy loading and code splitting techniques

UI/UX Designer

Feb 2023 – May 2023

Falco (Startup)

- Designed user interfaces for web and mobile applications, producing pixel-perfect, accessible mockups aligned with WCAG guidelines
- Created wireframes and interactive prototypes in Figma, reducing design-to-development handoff time
- Conducted user research and usability testing sessions, identifying 5+ key friction points and translating findings into actionable design improvements
- Maintained and documented design systems to ensure visual consistency across 10+ UI components

PROJECTS

Paidby - Escrow Service Application | *JavaScript, TypeScript, Next.js, PHP, HTML5, CSS3, Git, Redux* Oct 2022 – Mar 2023

- Built the complete frontend as the sole engineer, delivering a fully functional escrow service app from design to production
- Designed a scalable frontend architecture with Next.js and TypeScript, improving performance and SEO via server-side rendering
- Implemented unit testing with Jest, achieving 80%+ code coverage and reducing post-deployment bugs significantly
- Integrated frontend with PHP backend via REST APIs, handling secure payment flows and transaction state management using Redux

Puplar Project | *React, TypeScript, Jest, REST APIs* Mar 2021 – Jan 2022

- Built dynamic, data-driven user interfaces with reusable component architecture, cutting development time on new features by ~25%
- Tested and debugged frontend code using browser DevTools and Jest, maintaining high code quality throughout the project lifecycle
- Integrated frontend with backend REST APIs, handling asynchronous data fetching and state management for a seamless user experience

ICTU Library | *React, Node.js* 2026

- Designed and developed a full-stack digital library platform for ICT University, enabling students to browse, search, and access academic resources online
- Built a responsive React frontend with intuitive navigation, search filtering, and book detail views for seamless user experience across devices
- Developed a Node.js backend with RESTful APIs to handle resource management, user authentication, and data retrieval from the library database
- Delivered the complete project independently, from architecture design to production deployment

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP

Frameworks & Libraries: React, Next.js, Angular, Vue, Redux, Node.js

Styling: Tailwind CSS, SCSS, Component-Based Architecture

Tools & Platforms: Git, GitHub, Jest, CI/CD Pipelines, Agile/Scrum, Figma

Concepts: REST API Integration, Responsive Design, Performance Optimization, Accessibility (WCAG), Cross-Browser Compatibility, Unit Testing
